Learning Objective:

Learning Objective: using Core Motion framework, detect device Fall.

Please note: do not throw your device or devices to the floor to test working of your app.

Please note: do not throw yourself or your loved one or some one you know or acquaint to fall to the floor to test working of your app.

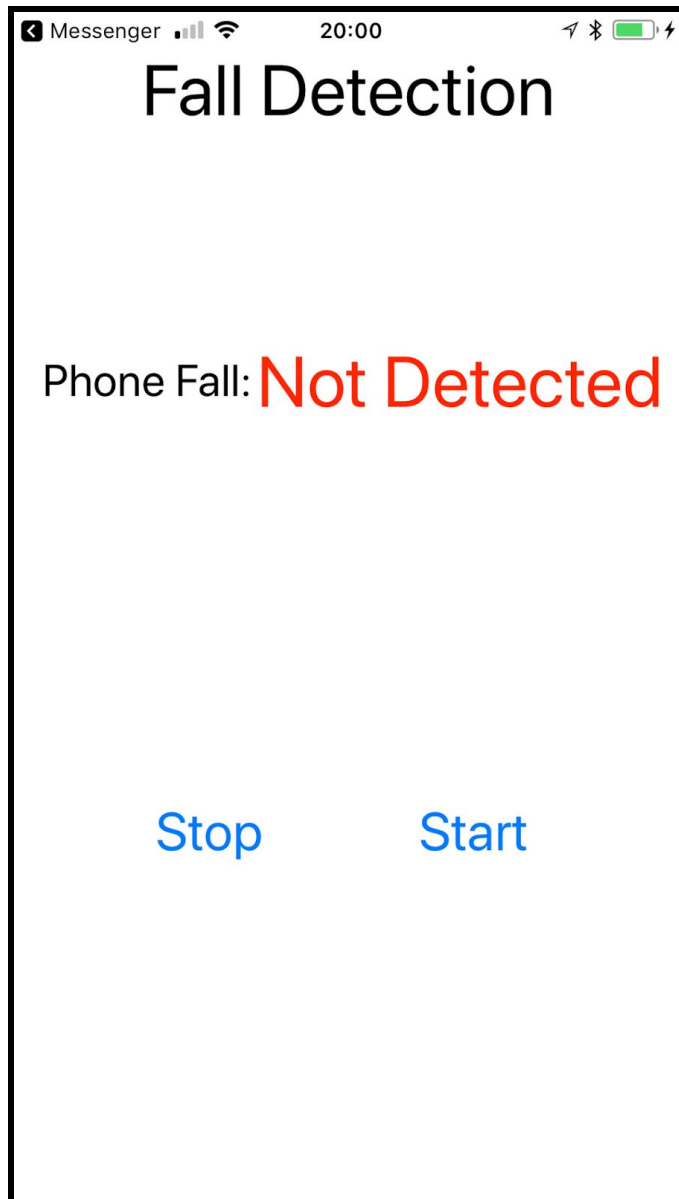

Application Flow: Hold your phone in your hand, briskly sit - to detect Fall scenario. *If you have knee or leg or other health issues, please do not perform the test. Your instructor will do.*
